Power Distribution in Large Buildings. Large buildings have a much higher electrical load than small buildings; therefore, the electrical equipment must be larger and more robust. Large building owners will also purchase electricity at high voltages (in the US, 13.8kV) because it comes at a cheaper rate.

Department of Electrical Engineering – Dr. Hussain Al-Mashat 1 Distribution Inside Large Buildings In large buildings the type of distribution depends on the building type, dimension, the length of supply cables, and the loads. The distribution system can be divided in to: The vertical supply system (rising mains).
