

# Download Half Timber House Origin Construction Illustr

Updated November 17, 2017. Half-timbering is a way of constructing wood frame structures with the structural timbers exposed. This medieval method of construction is called timber framing. A half-timbered building wears its wood frame on its sleeve, so to speak.

The half-timber house; its origin, design, modern plan, and construction; illustrated with photographs of old examples and American adaptations of the style

Half-timber work. Half-timber work was common in China and, in a refined form, in Japan and was used for domestic architecture throughout northern continental Europe, especially Germany and France, until the 17th century. In England it was popular in regions that lacked stone as a building material.

In 1912, Allen W. Jackson published *The Half-Timber House: Its Origin, Design, Modern Plan, and Construction*, and rambling half-timbered beach houses appeared on dune-front properties in Rhode Island or under palm-lined drives of Beverly Hills. During the 1920s increasingly minimal gestures towards some half-timbering in commercial speculative house-building saw the fashion diminish.
