Global disasters and environmental issues are a huge sign of the earth's deterioration. For instant, global warming, deforestation, and pollution are the planet's worse enemies, therefore human beings are reckless in their decision-making to encounter this matter. The real problem is ignorance and lack of acceptance of this horrifying issue.

environmental issues happening around them. The difficult and massive amount of information makes people

feel pressure and put some distance between them. In order to teach people about the effects of human acts toward the environment, I designed a website, which can access to maximal people. • The website contains
