This list represents a 1000-odd plants which have been classified as traded medicinal plants according to the ENVIS database. Some of the names have been verified against the Encyclopedia of Life database. We have found some discrepancies between some names we've tried to verify before and the actual names.

Excellent information about the best-known medicinal plants, including pharmacological and historical aspects of some Latin American natives, is given in Julia Morton, Major Medicinal Plants: Botany, Culture, and Uses (1977).

Tulsi / Basil. Tulsi or Holy Basil is called 'Elixir of Life' in Ayurveda in India and well known medicinal plant. It has been proved that Tulsi clears away the pollutants within the ten miles of its radius. Besides, Tulsi tea in India is very effective in treating common cold and flu. The plant also features in NASA list of air-purifying plants.

The presentation of "key" medicinal plants features 100 of the best known, including aloe, cayenne, cinnamon, lemon, clove, sage, and ginger, for example. The other 450 herbs include such familiar plants as oats, horseradish, tarragon, heather, and hemlock, and such exotic herbs as ylang-ylang, Iceland moss, and scurvy grass.

Medicinal plants, also called medicinal herbs, have been discovered and used in traditional medicine practices since prehistoric times. Plants synthesise hundreds of chemical compounds for functions including defence

against insects, fungi, diseases, and herbivorous mammals. Numerous phytochemicals with potential or established biological activity have been identified. However, since a single plant contains widely diverse phytochemicals, the effects of using a whole plant as medicine are uncertain.
