By default commas are considered column separators; in the case you are using them as decimal separators check the option below. The exponent can be indicated by preceding it by the character E or e, as you can see in the example. Data must consist of two columns, x and y, to get the power regression $y=ax^b$.

Dr. Chris Diehnelt is an Associate Research Professor in the Center for Innovations in Medicine in the Biodesign Institute at Arizona State University. He received his Ph.D. in Analytical Chemistry from Texas A&M University in 2001 under the supervision of Emile Schweikert. He has worked for Waters Corporation and completed a post-doctoral...
