If I had to describe N. K. Jemisin's The Hundred Thousand Kingdoms in one word it would be epic. Yeine is a character that I was immediately drawn to. She comes from a matriarchal society (which I really wanted to know more about) and is pulled into this game of musical heirs by her grandfather.

The Hundred Thousand Kingdoms (Inheritance Trilogy #1) Yeine Darr is an outcast from the barbarian north. But when her mother dies under mysterious circumstances, she is summoned to the majestic city of Sky. There, to her shock, Yeine is named an heiress to the king. But the throne of the Hundred Thousand Kingdoms is not easily won, and Yeine is thrust into a vicious power struggle.

The Hundred Thousand Kingdoms is not in the gritty modern fantasy category (e.g. A Song of Ice and Fire) or even the epic, dozen-book saga with detailed magic system category (e.g. Wheel of Time). Although the title references a hundred thousand kingdoms, the book only really mentions a handful, and all but two or three of those merely in passing.
